

Aplicatie Web - Magazin de telefoane mobile

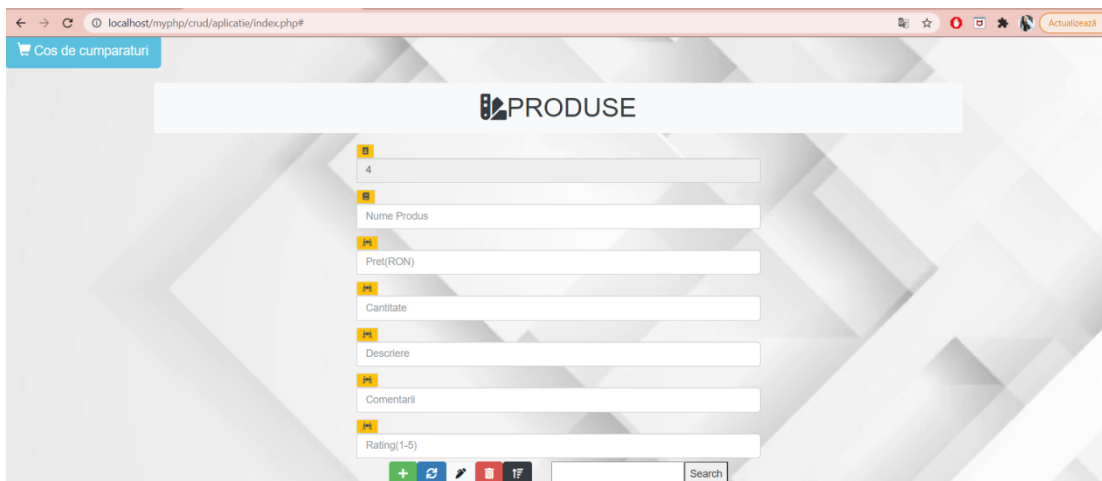

Implementare:

Aplicatia este implementata folosind o baza de date MySQL denumita *caracteristici_produs*. In cadrul acestei baze de date am creat tabela *produs* pe care am populat-o cu date conform cerintelor de implementare. Conectarea bazei de date cu backend-ul se face folosind un server local, PhpMyAdmin si aplicatia XAMPP. Limbajele folosite pentru back-end sunt PHP si JavaScript, iar pentru interfata am folosit HTML, CSS si Bootstrap.

Functionarea aplicatiei:

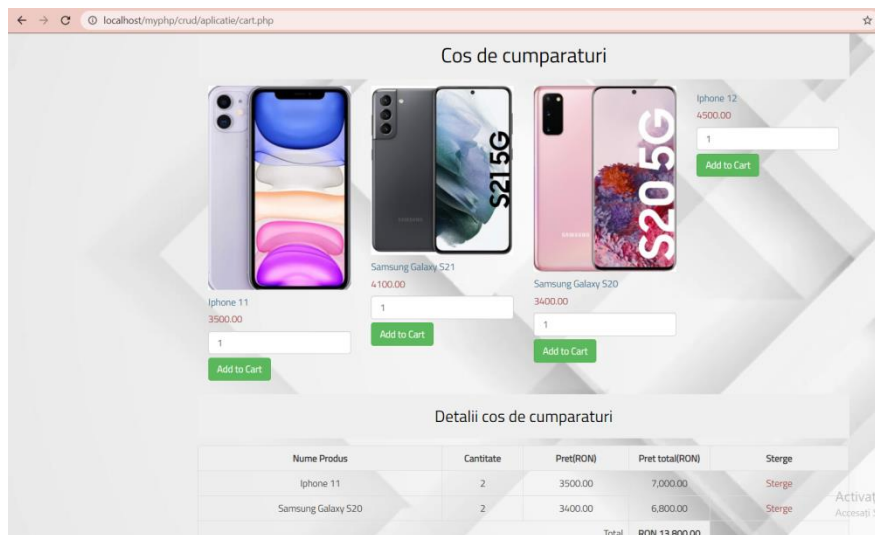

Aplicatia contine doua pagini, prima redirectionand catre cea de-a doua printr-un buton. Prima pagina contine meniul prin care se pot adauga intrari in tabela bazei de date, se pot updata informatiile legate de un produs, se poate sterge un produs sau se pot ordona produsele dupa criteriul ales, rating descrescator. Tot pe aceasta pagina se afla butonul Cos de cumparaturi, care redirectioneaza catre a doua pagina. In cadrul acesteia, se poate crea o lista de cumparaturi prin adaugarea cantitatii dorite din fiecare produs. De asemenea se afiseaza suma totala a cumparaturilor si se pot sterge produse adaugate in cos in prealabil.

Prima pagina:

The screenshot shows a web browser window with the URL `localhost/myphp/crud/aplicatie/index.php#`. The page has a header with a shopping cart icon and the text "Cos de cumparaturi". Below the header is a large white box with the word "PRODUSE" and a small icon. Underneath, there is a form with several input fields, each preceded by a small icon: a plus sign for "Nume Produs", a plus sign for "Pret(RON)", a plus sign for "Cantitate", a plus sign for "Descriere", a plus sign for "Comentarii", and a plus sign for "Rating(1-5)". At the bottom of the form is a "Search" button.

A doua pagina:

The screenshot shows a web browser window with the URL `localhost/myphp/crud/aplicatie/cart.php`. The page has a header with the text "Cos de cumparaturi". Below the header, there are three product cards. Each card shows a phone image, the product name, the price, and a quantity input field with an "Add to Cart" button. The products are: iPhone 11 (3500.00), Samsung Galaxy S21 (4100.00), and Samsung Galaxy S20 (3400.00). To the right of these cards is a fourth product card for iPhone 12 (4500.00) with a quantity input field and an "Add to Cart" button. Below the product cards is a section titled "Detalii cos de cumparaturi" which contains a table with the following data:

Nume Produs	Cantitate	Pret(RON)	Pret total(RON)	Sterge
iPhone 11	2	3500.00	7,000.00	Sterge
Samsung Galaxy S20	2	3400.00	6,800.00	Sterge
Total			RON 13,800.00	

At the bottom right of the page, there is a button labeled "Activati \ Accesati Set".
